Create In-Class Lectures using Lecture Capture Studio and Presenter. 2018. Abstract This is the third and final part of the series for AutoCAD and AutoCAD LT 2019. The series is designed for anyone who is new to AutoCAD and needs to use it in their business, as well as for AutoCAD, AutoCAD LT, and Visio. AutoCAD and AutoCAD LT are powerful tools that can get you and your work done. In this third and final part of this series, we will cover various topics from getting started to establishing and maintaining systems. In this part, we will cover: Introduction The first chapter will cover the basic installation of AutoCAD and AutoCAD LT. The next chapter will cover the basics of drawing, and we will cover various basic drawing tools. The third chapter will cover installing AutoCAD and AutoCAD LT. The last chapter will cover the basics of 3D and we will cover various topics such as creating 3D objects, 3D viewing and rendering, 3D manipulation, and 3D drawing and animation tools. For more detailed articles on AutoCAD or AutoCAD LT, you can go to: Save selected item in a DataGridViewComboBoxCell In a DataGridViewComboBoxCell, there is only the Edit mode and I want to save what is selected after the user has exited Edit mode. How can I do this? Private Sub dg_Settings_CellContentClick(ByVal sender As System.Object, ByVal e As System.Windows.Forms.DataGridViewCellEventArgs) Handles dg_Settings_CellContentClick If dg_Settings.SelectedCells.Count > 0 Then Dim selectedCombo As DataGridViewComboBoxCell = CType(dg_Settings.CurrentRow.Cells(dg_Settings.CurrentRow.Index).DataGridViewComboBoxCell) Dim save As String = selectedCombo.GetItemText(selectedCombo.SelectedIndex) End If End Sub A: As no one replied, I will put my own answer: Private Sub dg_Settings_CellContentClick(ByVal sender As System.Object, ByVal e As System.Windows.Forms.DataGridViewCellEventArgs) Handles dg_Settings_CellContentClick If dg_Settings.SelectedCells.Count > 0 Then Dim selectedCombo As DataGridViewComboBoxCell = CType(dg_Settings.CurrentRow.Cells(dg_Settings.CurrentRow.Index).DataGridViewComboBoxCell)
